# Use Case Example

**Use Case Story:**
User wants to login to site

**Assumption:**
User has existing account

**Steps:**
1. User loads front page
2. User enters their information in the username and password field
3. User hits submit
4. User is redirected to existing profile page

**Variable Interactions:**
- user needs to create their account > Provide signup
- user's account doesn't verify > Try again
- user tries to many times > lock them out
- forgot username/password > reset link
